

## BUSINESS

# APPLICATIONS BEYOND THE TREND

Improve business success through using the latest proven Microsoft technologies.

## GET THE RIGHT INFORMATION TO THE RIGHT PEOPLE

Despite the wide availability of 'off-the-shelf' business software, choosing the right application to meet your organisational needs is not as easy as it first appears. Ensuring that the solution delivers the necessary information to the appropriate people in your organisation can be the difference between business success and failure.

While 'off-the-shelf' applications can deliver productivity increases and cost savings 'out-of-the-box', to get an enhanced return on your investment requires some customisation. This will enable it to deliver real-time reporting on important business metrics such as order status, sales figures and sales performance in a simple and easy-to-read dashboard. Achieving this necessitates an understanding of your business and the unique processes that give you your competitive edge.

By partnering with an organisation that has the experience of designing and implementing information systems for many businesses, you will benefit from experienced know-how and understanding.

## RAPID RETURNS ON BUSINESS APPLICATIONS

Wem Technology is a Microsoft Gold Partner. This highest level of accreditation means that we have invested significant resources that enable you to obtain a rapid return on your business applications. Coupled with this, we are able to offer hosted services, web and new media design that ensure your business is equipped to deal with the challenges of the 21st Century.

Our portfolio covers:

- Cloud Computing
- Microsoft Office SharePoint Server
- NET development
- Hosted services
- Design and New Media

## MICROSOFT OFFICE SHAREPOINT SERVER – KEY INFORMATION AND METRICS IN ONE PLACE

Microsoft Office SharePoint Server is an integrated suite of server capabilities that can help improve your effectiveness by providing comprehensive content management and enterprise search, accelerating shared business processes and facilitating information-sharing across boundaries for better business insight.

It supports all Intranet, Extranet and Web applications across an enterprise within one integrated platform. Additionally, it provides IT professionals and developers with the platform and tools they need for server administration, application extensibility and interoperability.

## COMPLETE .NET DESIGN AND DEVELOPMENT SERVICE

The .NET Framework is Microsoft's platform for building applications that have visually stunning user experiences, seamless and secure communication and the ability to model a range of business processes.

We have the expertise to manage and develop your software project and build applications that work the way you want, in the programming language you prefer, across software, services and the devices your business needs.

## FULL RANGE OF HOSTED SERVICES TO SAVE MONEY AND TIME

Even though hardware costs have generally fallen over the last few years, it can still be a very expensive exercise to set-up a high specification server to look after your website, e-mail or business applications such as CRM. As a result, more organisations are looking to have their services hosted externally in the "Cloud" as this provides a very cost-effective alternative.

We provide a wide range of hosted services from our secure data centres which are located in Europe. From basic Web-hosting and fully-managed dedicated servers, right through to hosted email, data and backup, we have the expertise to help you really succeed and work anywhere.

## ABOUT WEM TECHNOLOGY

Wem Technology is part of a group of companies that together specialise in business development and support through technology that's way beyond the trend.

Our ethos is to apply our skill and expertise to all your technology needs, so you're free to focus on running your business.

## DESIGN AND NEW MEDIA FOR EFFECTIVE PROMOTION OF YOUR BUSINESS

Ensuring your business is promoted to maximum benefit is becoming increasingly difficult in a world of multi-media. Wem Technology have partnered with Symbius creative solutions to enable us to offer a comprehensive portfolio of Website design, branding and printing services that will ensure your business is effectively publicised in your chosen markets.

*“WEM's Virtualisation knowledge has allowed us to consolidate our servers and save rack space, protecting our investment in older software by improving its performance and helped our business continuity plans by allowing us to mount core servers on any other hardware.”*
